Introduction

ManiaLinks are little websites, which can be viewed directly in the game. If you always wanted to make your own ManiaLink, you are on the exact right place: This Tutorial will introduce the ManiaLinks and their creation to you. You already know how to make a ManiaLink for TrackMania Forever, and now want to upgrade your knowledge to ManiaPlanet? Then this Tutorial will help you, too.

Registration

Manialinks need to be registered with the central gamesystem, so that they can be called from within the game under a certain shortlink.

Go to the playerpage : http://player.maniaplanet.com/

CLICK IMAGE TO ZOOM

Go to the tab "Manialinks"

Here you can register your manialink(s) with the details described on the image. The 1st manialink you register is free, any other one will cost you 100 planets for every 30 days. The table will also show how much you've earned by costly manialinks.

While registering there is no difference between normal "**Manialinks**" and "**ManiCode**" URLs.
You can register your manialink before or after you actually built the manialink "website". That doesn't really matter.
